Client
News International

Main Contractor
Carillion

Design Consultant
DSSR

Project Value - £300 Million

Sub-Contract Value - £4.5 Million

Sub-Contract Programme – 7 month
1st fix programme

Project Description

The largest of 4 design & build press facilities that were constructed by Carillion on a green field site north of London. The project comprised the construction of a 35,500 m² colour printing and distribution facility for News International.

Scope of Services

As a sub contractor to Skanska Rashleigh Weatherfoil ASM were tasked with the supply and installation of all ductwork services to a very fast track programme of circa 8 months.

The project posed particular challenges, the installation of large duct sections in extremely high level plantrooms which ran the length of the building, circa 400m. We also manufactured and installed the 3m² “walk in” plenums on the Ink Mist Filters.
